Identifiable speeds are the maximum attainable line speed except for 250/25 and 1000/50 plans (outside of peak hours). You will likely not experience these maximum speeds, please refer to the typical evening speeds in the Key Fact Sheet.

**New plan with theoretical maximum speed and only available for select areas. As this plan is new we do not have enough data to provide an average sampled evening speed. Our website and Key Fact Sheet will be updated once this is available. If your attainable service line speed (on FTTN/FTTB/FTTC) cannot support this speed tier, we can move you to a lower speed tier or you can terminate your service.

SERVICE DESCRIPTION

Your service is delivered through the LBN, Opticomm, OPEN Networks, and NBN networks with speed ranging between 25/5 Mbps and 1000/50 Mbps depending on the plan chosen (see table above).

Any cabling that is required in your premises beyond the network boundary point is your cost and responsibility.

If you use equipment that we have not supplied to you or otherwise approved, then we may assist you with that equipment, but cannot be responsible for its operation.

THE MINIMUM CONTRACT TERM

The services are supplied on a no lock-in contract with a minimum term of 30 days, or 12- and 24-month contract term.

SERVICE SPEEDS

Service speeds can vary due to factors such as: the type of technology available with your service, network capacity, local factors such as the performance of your computer equipment including your router and wireless network.

EQUIPMENT SET UP

A network termination device will be installed into your premises and a router is required to access the service. In order to distribute WiFi to multiple users in your home, HFC & FTTH customers will require an ethernet WAN (E-WAN) compatible router and FTTN, FTTB & VDSL customers will require a VDSL2 compatible modem or router.

Many home routers and Wi-Fi networks will bottleneck your connection to the internet, especially with our faster fibre plans.

It is possible to use some of these technology types without a router, but we recommend against this for security reasons

You may upgrade this plan by requesting a plan change before the end of the billing period (which is a calendar month). New plan to begin at the commencement of the next month. The plan can be changed to any compatible fibre plan with no additional costs for plan changes.

We can provide a router with your chosen plan at an additional once-off cost.

All plans are subject to our Acceptable Use Policy. You must not use your service in an unreasonable manner which detrimentally affects our network.
